

Mohamed Eid Eltonbary

Front-End Developer

Profile

"Front-End Developer skilled in HTML, CSS, JavaScript, React, Next.js, TypeScript, Tailwind CSS, and Bootstrap. Experienced in building responsive web applications and integrating REST APIs. Currently expanding Full-Stack MERN skills through ITI training."

Education

Computer Science at Damanhour University, Beheira, Egypt

October 2024 - Present

Grade: 3.1

Internships

Full-Stack MERN Developer Trainee at Information Technology Institute (ITI), Damanhour, Egypt

November 2025 - Present

"Enrolled in the intensive Full-Stack web development track, acquiring hands-on experience in building scalable web applications using the MERN stack."

- Developed practical projects focusing on database management with MongoDB, back-end logic with Express and Node.js, and dynamic UIs with React.

Skills

Front End: "HTML, CSS, JavaScript, React.js, Next.js, TypeScript, Bootstrap, Tailwind CSS, REST APIs, Redux, Git."

Back End: Basic Node.js, MongoDB, SQL, NoSQL

Projects

E-Commerce • [GitHub](#) • [Live Demo](#)

September 2025 - September 2025

"Developed a fully functional E-commerce front-end application built with Next.js, React, TypeScript, and Tailwind CSS, focusing on high performance and responsive design."

- Implemented state management and user interactions using modern React hooks and reusable components with Shadcn UI.
- Optimized application performance, ensuring fast loading times, clean code architecture, and full mobile-to-desktop responsiveness.

Meal Recipes App • [GitHub](#) • [Live Demo](#)

May 2025 - May 2025

"Built a dynamic Meal Recipes web application utilizing React, JavaScript, and integrating third-party REST APIs to fetch and display culinary data smoothly."
